

THERE IS NO ANTIMEMETICS PARTY GAME

UNOFFICIAL

COGNITHAZARD CLEARANCE: LEVEL 4

UNOFFICIAL FAN WORK // NO AFFILIATION WITH QNTM, SCP AUTHORS, OR SHORT STORY CREATORS

⚠️ **UNOFFICIAL FAN CREATION:** This is an independent, non-commercial tribute game inspired by qntm's (Sam Hughes) *"There Is No Antimemetics Division"* and the SCP Foundation collaborative wiki. It is completely unofficial and possesses **no affiliation, authorization, sponsorship, or endorsement** from qntm or the creators/authors of the books and short stories.

⚙️ 0. GAME SETUP

STANDARD TABLETOP DISPOSITION

1. **Reference Sheets:** Give each player 1 double-sided Reference Sheet (Front: *Field Directive Index*; Reverse: *Conceptual Reference Matrix*).

2. **Buzzer & Tokens:** Place the **Giant Foam Buzzer** in the center of the table, with the reserve bank of **44 Point Tokens** beside it.

3. **Deck:** Shuffle the **50 Anomaly Cards** and place them face-down as the draw deck.

1. ROUND SETUP (INITIALIZATION)

1. **Reveal 5 to 7 cards** face-up in the center of the table.

2. **Memorize (15s):** All players observe and memorize the cards. Then turn them face-down and shuffle them together (induced amnesia).

3. **The Anomaly:** The Active Researcher secretly looks at **one** of these cards without showing anyone. This card is the Anomaly.

2. GIVING CLUES (THE DEGRADATION LOOP)

The Researcher puts **1 Point Token** on their Matrix to start. Then, recite clues rhythmically in a continuous loop:

1. **Action:** "It does not [Verb]" (*e.g., does not fly*)

2. **State:** "It is not [Adjective]" (*e.g., is not soft*)

3. **Anatomy:** "It has no [Property]" (*e.g., has no wheels*)

4. **Taxonomy:** "It does not belong to [Category]" (*e.g., not food*)

• **Escalating Stakes:** Every time the Researcher completes all 4 lines, add **+1 Point Token** and immediately start the next loop.

🚨 **BREACH:** Naming any positive property causes an immediate breach: the round ends instantly with **0 points for everyone!**

3. GUESSING & SCORING (INTERCEPTION)

• **Hit the Buzzer Anytime:** Any player can slam the buzzer at any moment—even mid-sentence! The Researcher **must stop speaking immediately**.

• **1 Guess per Round:** Each player gets exactly one guess per round.

❌ **Wrong Guess (Lockdown):** Rotate your Reference Sheet **90° sideways**. You cannot speak or guess again this round. The Researcher **resumes the loop** from where they were interrupted.

⚠️ **LAST PLAYER STANDING RULE:**
If all guessing players except one are locked out, **the round ends immediately!** The last remaining player loses the chance to guess (you cannot wait safely for everyone else to fail!).

🟢 **Correct Guess (Mutual Survival):** The Researcher claims all tokens on their Matrix; the guessing player gets an equal amount from the reserve. Pass the Researcher role clockwise.

🔴 **Total Erasure:** If everyone fails (or the round is closed early by the Last Player rule), the Anomaly escapes. **0 points awarded.**

🏆 **VICTORY:** First player to reach **7 Points** wins immediately!

🔍 AUTONOMOUS TESTING PROTOCOL (SOLO PLAYTEST DRILL)

MODE: QUARANTINE SIMULATOR

Field Agents can test and calibrate the game **completely autonomously** after printing with this individual verification drill:

1. **Amnesia Setup:** Take 6 random Subject Cards from the archive, memorize them for 20 seconds, and place them face down in a row.

2. **Inverse Negative Synthesis:** Draw the target anomaly card blindly (or use the companion site). Formulate aloud **3 complete Degradation Loops** (exactly 12 negative constraints: 3 Actions, 3 States, 3 Anatomies, 3 Taxonomies) that distinguish the target without naming positive traits.

3. **Timed Interception:** Start a 15-second countdown timer, flip the 6 face-down cards, and identify the Anomaly instantly using only your negative parameters. If correct on the first attempt, claim the loop yield points (1 to 3 tokens). If you hesitate or misidentify, mark 1 Containment Breach. Reach 7 Yield Points before 3 breaches to achieve solo certification!

CONTAINMENT CODEX // CLASSIFIED FIELD ADVISORY

⚠️ **ANTIMEMETIC COGNITIVE CAUTION:**
An antimeme is an idea with self-censoring properties. You cannot describe what it is without contaminating the local cognitive baseline.

THE RESEARCHER'S OBLIGATION:

You must never pause indefinitely. Speak the 4 loop vectors rhythmically. If you slip and state a positive property ("It is metallic..."), you trigger a localized cognitive breach: the round ends instantly with 0 points awarded.

THE TIMING OF THE SLAM:

Agents may strike the Soft Override Interface at any moment during or between loops. The Active Researcher must halt their sentence immediately upon the buzzer slam.

RECOMMENDED TABLE LAYOUT:

Place the Soft Override Buzzer precisely equidistant from all Agents. Keep the face-down anomaly memory pool organized in an arc.

TACTICAL SOFT OVERRIDE TARGET (EMERGENCY SLAM PAD) [UNOFFICIAL]

If the physical high-density foam buzzer is unavailable, place this target pad in the center of the table. Agents strike the pad with an open palm to register their interception!
